

RDA Health Science Classes raise \$ 1715 for Spartanburg Regional Hospice

For the past 3 years, Health Science Classes and faculty have participated in the Annual Festival of Trees, hosted by the Spartanburg Regional Foundation. All proceeds from this event benefit the Spartanburg Regional Hospice.

This year the event was held at the Spartanburg Marriott at Renaissance Park. Students created 15 “themed” Christmas trees and 12 decorated wreaths. Some of the themes included: “Dancing in the Rain”, “Traditional Bash”, “Touched by an Angel”, “Duckitude”, “Pinkalicious”, “Zebras and Pearls”, “Willie Wonka”, “Santa and His Elves”, “Elf Magic”, “Winter”, and “Hello Kitty”. This year they raised \$1715, however since participating in the event, they have raised over \$3800! Kelly Eppers, Health Science instructor says, “A fundamental part of teaching future health care givers is to help them understand about giving and playing an important role in community service and outreach programs. It really excites the students to know that they are donating to a wonderful cause and that they can make a difference right now in the lives of those who are sick.” We are very proud of our Health Science students, their dedication, their integrity and their commitment to excellence!
